Education

University of Florida

Aug. 2023 – May 2027

Bachelor of Science, Computer Engineering

GPA: 3.94/4.0

Bachelor of Arts, Economics

GPA: 4.0/4.0

Certificates in Project Management and Artificial Intelligence Fundamentals and Applications

- **Dean's List:** Fall 2023, Spring 2024, Fall 2024, Spring 2025
- **Relevant Coursework:** Data Structures and Algorithm, Applied Machine Learning Systems, Software Engineering, Circuits, Microprocessor Applications, Digital Logic and Computer Systems, Computer Organization, Object-Oriented Programming

Skills

Programming Languages: Python, C++, Java, JavaScript, SQL, R, MATLAB, VHDL, Assembly, HTML/CSS

Frameworks/Libraries: React.js, Bootstrap, Express.js, Node.js, Flask, TensorFlow, Scikit-learn, Pandas, NumPy

Tools: Git, Docker, Kubernetes, MongoDB, Jenkins, Bazel, JIRA, Power BI, Mixpanel, Google Analytics, Figma, Arduino

Experience

Teaching Assistant | University of Florida

Aug. 2025 – Present

Data Structures and Algorithms & Digital Logic and Computer Systems & Programming Fundamentals 1

- Instructed 100+ students across sections, achieved 100% completion of C++ programming challenges and hardware labs
- Coordinated 8+ weekly office hours to offer code reviews and debugging support; boosted exam averages by 22%
- Developed course content (30+ assignments, 15 hardware demos, 6 exams, and automated testing suite) for 1200+ students

Product Management Intern | MoMo (M_Service)

May 2025 – Aug. 2025

- Spearheaded end-to-end development of an automation tool on MoMo's digital lending platform (40M+ users), enforced builds with Bazel and CI/CD with Jenkins, cutting lending rule deployment by 80% and reducing manual errors by 70%
- Analyzed user behavior data from 2M+ transactions using BigQuery/SQL and A/B testing to prioritize 5 key features, accelerating feature delivery by 15% and improving 30-day retention rate by 32%
- Facilitated Scrum ceremonies and tracked scope in Jira/Confluence to launch mobile-web parity features across 3 platforms

Software Engineering Fellow | Uber

Feb. 2025 – Aug. 2025

- Selected for Uber Career Prep Fellowship (2.3% acceptance rate) by demonstrating data structures and algorithms skills
- Accelerated algorithmic proficiency by working with Uber engineers 1:1 to solve 70+ technical interview problems

Product Management Intern | Nami Technology

Jun. 2024 – Aug. 2024

- Spearheaded the development of an NLP conversation-analysis tool (scikit-learn, pandas) with a Flask REST API and NoSQL storage for customer service, adopted by 3 enterprise clients and reduced ticket resolution time by 38%
- Identified 10+ critical usability issues in client's digital retail management systems by utilizing market research, SWOT analysis, and usability testing, reducing client onboarding time by 24% and lifting customers' satisfaction scores by 18%
- Redesigned UI/UX prototypes using Figma with user-centered design and A/B testing, driving 36% increase in active users

Projects

ChompCourse | Software Engineer & Product Lead | WiCSE Design Team

Aug. 2024 – May 2025

- Engineered a full-stack app with Flask, React, Firebase, Expo that produces personalized, semester-by-semester course roadmaps tailored to each student's major, interests, and preferences for 100+ test users through iterative releases
- Automated UF course catalog scraping with Selenium, keeping 1,000+ course entries up to date with prerequisite graphing

SET Dumpy | Electrical Engineer & Product Lead | SASE Engineering Team

Aug. 2023 – May 2024

- Collaborated with a team of 27 to engineer "SET Dumpy" – an automated robot that detects and cleans up trash utilizing computer vision and SLAM algorithm (Python/OpenCV) for detection/navigation, achieved 90%+ detection accuracy
- Integrated Arduino microprocessors, LiDAR sensor, linear actuators, and motors; tuned control loops for 88% grasp success

Leadership

Director of Professional Development | UF Product Space

Jun. 2025 – Present

- Spearheaded 6 workshops for 100+ members on product management skillset, developed tailored training resources
- Coordinated a product management fellowship matching 40+ fellows with 6 local startups; organized project scoping, matching, and sponsor check-ins across 8-week sprints; delivered 14 company-approved projects with 100% completion

Director of Awards | UF WiNGHacks

Jul. 2024 – Present

- Collaborated with 15 committee heads and directors to oversee and ensure seamless operations of WiNGHacks 2025 – UF first hackathon focused on uplifting women, nonbinary people, and gender minorities – attended by 120+ hackers
- Directed 5 committee members to develop awards categories, manage \$10,000+ fundings for prizes, and recruit 30+ judges
